

Snow Lotus – Antibacterial herbal pantyliners

Action:

- antibacterial, anti-fungal, antiviral
- anti-itch, anti-inflammatory
- painkilling, regenerative, protective
- caring, moisturising

Recommended for:

- irritation of intimate parts
- vaginal discharge and itchiness of intimate parts
- vaginal dryness
- unpleasant smell of intimate parts
- premenstrual tension
- recurring infections of intimate parts
- urinary bladder infections
- urinary incontinence
- vaginal microflora balance disorders (after antibiotic therapy)
- daily care and protection of intimate parts

Directions:

Peel off the protective paper layer, and then attach the pantyliner on the inside of the underwear to allow contact between the liner and your private parts.

One pantyliner works for 24 hours and during this time the extract contained in the pantyliner is gradually released under the influence of the body heat.

Change the pantyliner as often as necessary but at least every 24 hrs.

30 minutes after application it brings relief in the case of itchiness and burning sensation of the intimate parts.

Sanitary, single-use product.

Contraindications:

Do not use during pregnancy.

Additional information:

- **Snow Lotus** pantyliners can be used for longer periods of time – therefore, they are recommended to women as an important element of long term-care.
- When using vaginal medications, the use of pantyliners should be consulted with a gynaecologist or the use of **Snow Lotus** pantyliners should be discontinued.
- Product tested dermatologically.
